

Physical Science, Prep

Course Description

The goal is to introduce students to the basic concepts of physical science in a study of matter and energy, particularly in the areas of chemistry and physics. The Scientific Method is taught, following with an emphasis on understanding the basic phenomena of chemistry, physics and developing laboratory skills. Lecture format, video presentations and laboratory work will be used to achieve these skills. While the basic concepts of these areas will be stressed, further applications to everyday life will be addressed.
